FULLSTACK SOFTWARE ENGINEER

Fullstack Software Engineer with over 4 years of experience building and optimizing enterprise-scale applications. Versatile technical skill set spanning modern web ecosystems (TypeScript, React, Node.js) and robust backend architectures (Java Spring Boot, Microservices). Proven track record in legacy system modernization, CI/CD automation, and resolving complex production incidents in distributed environments

EXPERIENCE

UKG

October 2024 – Present

Fullstack Software Engineer

Fort Lauderdale, FL

- Develop and maintain critical Java Spring Boot services for the Time & Attendance (UTA) platform, integrating with UKG Pro and enterprise payroll systems to handle high transaction volumes across distributed environments.
- Led a major Infor platform and Java 8 → JDK 17 upgrade across a large, business-critical UTA legacy codebase, including SQL Server migration from version 16 to 22, working directly with stakeholders to understand requirements and plan the migration while optimizing services for improved performance.
- Designed and implemented monitoring solutions for distributed services, ensuring high availability and quick problem resolution in production environments.
- Owned the API integration layer, including a Java mobile gateway used by the UKG mobile app to securely connect to customer UTA environments, continuously collaborating with stakeholders to refine API specifications.
- Owned and resolved customer-blocking production incidents across distributed Java services, applying deep system design knowledge and algorithmic problem-solving for quick resolution.

Discover Financial Services

July 2022 – July 2024

Backend Software Engineer

Riverwoods, IL – Remote

- Built and optimized high-volume, distributed RESTful APIs using TypeScript and Node.js, working directly with stakeholders to understand requirements and reduce custom implementations.
- Implemented comprehensive monitoring and production support for backend services, ensuring reliability and performance under high load conditions.
- Set up CI/CD pipelines with Jenkins for automated testing and deployment, incorporating quality gates to ensure consistently high code quality.
- Designed and optimized backend systems to handle large datasets efficiently, applying strong knowledge of data structures and algorithms.
- Collaborated with data science teams to integrate machine learning models into backend services, improving data-driven decision-making capabilities.
- Created comprehensive API documentation using Swagger, ensuring clear communication of API contracts to stakeholders and reducing implementation errors.

Business Technology Intern

June 2021 - Aug 2021

- Developed a content processor that converted markdown files to HTML, enhancing an internal website's usability for over 700 Discover employees. Utilized technologies such as Node, Pivotal Cloud Foundry, and Markdown
- Cooperated successfully with a diverse team of interns, leveraging collective skills to successfully complete and present a comprehensive project, demonstrating strong teamwork and communication abilities in a professional setting

PROJECTS

RatingsDB - Raycast Extension | *TypeScript, React, Node.js, REST APIs*

2024 – Present

- Published a productivity extension to the Raycast Store with **300+ active users**, enabling rapid media discovery and rating comparisons directly from the macOS launcher
- Integrated multiple third-party APIs (OMDB, Watchmode) to aggregate real-time metadata, streaming availability, and Rotten Tomatoes/Metacritic scores

- Leveraged Raycast's React-based API to build a native-feeling UI with optimistic updates, caching strategies, and AI-powered summaries

Spotify Profile | *React, Node, Express, Tailwind, Firebase*

2024

- Developed a dynamic web application and playlist generator using the Spotify API, enabling users to explore personalized music recommendations based on their listening history and top tracks
- Handled authentication and API requests by integrating Firebase Functions, providing secure, serverless backend services to manage user data and interactions, and hosting the application on Netlify for reliable deployment
- Utilized modern web technologies to build a responsive and visually appealing user interface, ensuring uninterrupted performance across various devices and screen sizes

Portfolio Website | *React, Gatsby, Firebase*

2023

- A modern, performant, and visually appealing personal portfolio website built with Gatsby
- Hosted on Firebase for easy updates/deployments and reliable performance

Misu - Smart Home Mobile App | *React Native, Home Assistant, Node, Redux*

2022

- Mobile application that allows a homeowner to safely share access to their smart home devices to their guests
- Refactored over 10,000 lines of code to meet industry standards, demonstrating adaptability and large-scale project management skills
- Implemented responsive design principles to guarantee seamless functionality and consistent user experience across both iOS and Android platforms, expanding the app's accessibility

EDUCATION

University of Central Florida – GPA 3.5

Orlando, FL

Bachelor of Science in Computer Science

August 2019 – May 2022

Valencia College

Kissimmee, FL

Associate of Art in General Studies

August 2016 – December 2018

TECHNICAL SKILLS

Languages and Technologies: Node.js, Java, Spring Boot, Microservices, TypeScript, Express, Kubernetes, Docker, SQL (Postgres, MariaDB, MS SQL), Python, Redis, Kafka, RabbitMQ, REST API Design, Distributed Systems

Tools & Platforms: Jira, Git, Docker, OpenShift, IntelliJ, Jenkins, AWS, JFrog Artifactory, Swagger, Datadog, Prometheus, ELK Stack, CI/CD Pipelines

CORE COMPETENCIES

API Design — Distributed Systems — Stakeholder Communication — System Architecture — High-Volume Services — Data Structures & Algorithms — Big Data Processing — Production Monitoring — Machine Learning Integration — Cloud Technologies — Agile Methodologies — Continuous Integration/Continuous Deployment (CI/CD) — Technical Documentation — Problem Solving — Quality-Focused Development — Performance Optimization
